ABOUT ME

Software Engineering graduate with strong skills in software development, web development, and system design. Hands-on experience with Java, C#, ASP.NET, SQL Server, JavaScript, and Git, with solid knowledge of object-oriented programming, data structures, algorithms, Agile, and software testing. Capable of working effectively in teams and delivering innovative and efficient solutions. Passionate about learning new technologies, writing clean and maintainable code, and adapting quickly to new challenges.

EDUCATION

Bachelor's Degree in Software Engineering 2026

The Hashemite University - Jordan

PROJECTS

Health Management System (HMS) 2025

- Developed a secure, web-based platform that enables healthcare centers to share medical records, manage organ requests, and use AI to analyze medical reports and suggest suitable medications or doctors.
- Implemented the back-end logic and SQL Server database using ASP.NET, with a responsive HTML5/CSS3/JavaScript front end.
- Technologies: HTML5, CSS3, JavaScript, ASP.NET, C#, SQL Server.

Personal Portfolio 2026

- Designed and built a responsive personal website to present my professional profile, including About, Experience, Education, Skills, Projects, and Contact sections.
- Technologies: HTML5, CSS3, Responsive Design.
- **Live Website:** https://shahedkhamaiseh1.github.io

TRAINING EXPERIENCE

Ministry of Education – Jordan 2025

Networks and Educational Technology

- Computer hardware troubleshooting and maintenance.
- Installation and configuration of operating systems and software.
- Networking fundamentals, setup, and connectivity troubleshooting.

Self-Learning Ongoing

- Improving my software development skills through self-directed online learning and practice.

TECHNICAL SKILLS

- **Programming Languages:** Java, Python, C++, C#
- **Web Development:** HTML5, CSS3, JavaScript, Responsive Design, Front-End & Back-End Development
- **Frameworks & Technologies:** ASP.NET
- **Database Management:** MySQL, SQL Server, SQL
- Software Development Life Cycle (SDLC) & Agile Methodologies
- Object-Oriented Programming (OOP)
- Data Structures & Algorithms
- Software Testing & Debugging
- **Version Control:** Git & GitHub
- Software Design & UML Modeling

PERSONAL SKILLS

- Problem-Solving Skills
- Analytical Thinking
- Teamwork & Collaboration
- Communication
- Adaptability
- Creativity

LANGUAGES

- Arabic: Native speaker
- English: Good
